Functional Specs

- Create a responsive Tableless layout in Bootstrap with 3 breakpoints. Desktop, Tablet and Mobile based on the designs shared.

Sign In Page:

- User must login by entering user name and password
- User name : Should be “**Cognizant”**
- Password : Should be “**Hello123”**
    - Only if the above credentials are entered , then the user should be logged in on click of the Sign In button and taken to the Home page.
    - In case of incorrect credentials, show an error message using a default alert popup with a message that the credentials entered are incorrect. The user should remain on the same page.

Functional Specs continued

Home Page :

- Desktop and iPad view must have a header bar, body content and footer.
- When the Page is converted to the Mobile view the Header menu items should be converted to a Hamburger menu.
- The Hamburger menu should expand on click and all the Header menu items should be visible.
- Use Bootstrap Carousel for the body section. Every section must have different content but the same image throughout.
- Must be compatible across all latest devices and browsers.

  Do not use any 3rd party plugins or libraries to implement this.
